

GLOBAL CITIZENSHIP

Building a Better World

Helping people prepare for and lead change is as much a part of *Building a Better World* as the engineering solutions we provide. We saw the impact of our values in action this year when we invested time and energy to help others better understand and manage our vital water and natural resources.

EDUCATION

We partnered with schools and organizations to inspire future engineers.

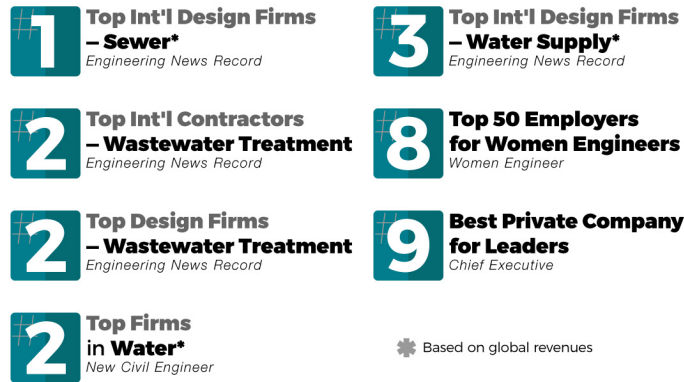

DIVERSITY

We defined a clearer path to leadership for women within the organization.

SERVICE

MWH employees brought welcomed change to communities in need by volunteering with the humanitarian organizations Engineers Without Borders USA and WaterAid, to name just a few.
